

# STRUCTURED CABLING SOLUTIONS

## RELIABLE, SCALABLE NETWORK INFRASTRUCTURE TO BUILD ON

Support your voice, video, data applications and management systems with a well-designed, integrated structured cabling system that powers and provides dependable connectivity to your critical IT network infrastructure.

### Qualifications

Diversified holds certifications from leading industry organizations including:

### Network Architecture

In today's competitive global marketplace, the Internet of Things (IoT) is connected by complex wired and wireless infrastructure. Diversified understands the need for specific design performance with fiber, copper, and wireless integrations where business applications rely on a consistent and reliable network architecture for optimum data flow.

From single room applications to enterprise level, multi-campus or global networks, we offer design, project management and implementation of:

- End-to-End Structured Cabling Systems
- Sound Masking Solutions
- Data Center Installations
- Fiber-optic Installation
- Wireless Design and Implementation
- Wireless Point-to-Point and Multi-Point Connectivity
- Distributed Antenna System (DAS)
- Bicsi-Certified RCDD'S

### Services

- Design & Engineering
- Systems & Installation
- Project Management
- Rack & Stack
- Documentation & Submittals

## ECOSYSTEM PARTNERS

## ONE HAND TO SHAKE

Diversified complements the breadth of our service offerings by building upon a superior communications network of Wi-Fi, voice, data and fiber-optics, providing comprehensive, reliable solutions for our clients.

Whether it is wireless spectrum analysis and installation, or fiber and copper infrastructure, our certified team of telecommunications and network specialists will design a system that will serve as a backbone for your needs today while providing for the capacity to grow tomorrow. This offering allows for seamless transition throughout your project's design, engineering, installation and integration phases, as well as providing a single point of contact to manage your project and coordinate auxiliary trades.

With Visual Collaboration continuing to stretch the capabilities of the network, it is our belief that a well-designed transport system (wireless and wired) is critical to the success of your overall IT systems investment. From your project's inception to completion, rely on Diversified for consistent, best-in-class products & services.
